

va Rajovic V-1 ANIMAL REPORT

ANIMAL NAME: Giraffe

Classification:

- amphibian
- fish
- reptile
- bird
- **mammal**
- insect

Diet: ~~meat~~ Leaves and branches

Life span: 20-25 year

Habitat: Savanna

Continent: South Africa

Physical appearance:

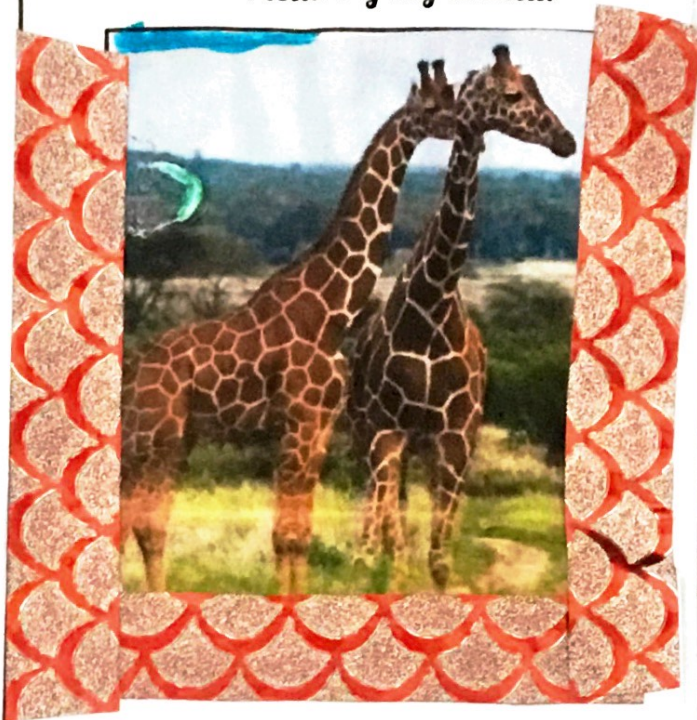

Size: 6m

Weight: 800kg

Colour: Brown, white, orange

Skin: Brown, white, orange

Picture of my animal

Characteristics:

timid
intelligent
sharp eyesight
fast
high

Interesting facts:

Giraffes are the only animals born with horns.

Giraffes have longest tail among terrestrial animals

ANIMAL REPORT

ANIMAL NAME: Bee

Classification:

- amphibian
- fish
- reptile
- bird
- mammal
- insect

Diet: Bees collect pollen and pollen it's their food

Life span: The average life span is 45 days

Habitat: To all continents except Antarctica

Continent: They are found in places with many flowers

Physical appearance:

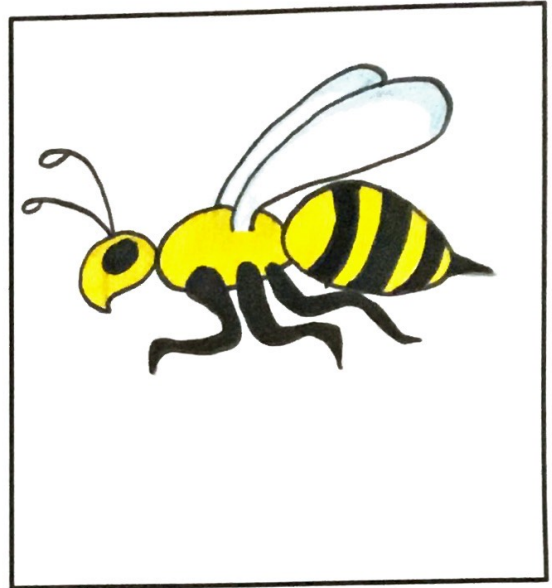

Size: Height from 2mm to 4cm

Weight: The bee weighs 1 to 10 grams

Colour: Bees have yellow, black and white on them

Skin: The skin is covered with small fur

Picture of my animal

Characteristics:

They produce food that humans eat

Interesting facts:

There are 20,000 species of bees on earth, the egg lives up to seven years a day hatching eggs. As much as 3 its weight. When collecting nectar, bees visit about 1,000 flowers a day.

ANIMAL REPORT

ANIMAL NAME: tiger

Classification:

- amphibian
- fish
- reptile
- bird
- **manimal**
- insect

Diet: They feed on meat

Life span: lives eighteen years

Habitat: living in the ^{ENH} expanses

Continent: Africa and Asia

Physical appearance:

Size: big

Weight: four hundred pounds

Colour: orange-black

Skin: their coats are fat

Picture of my animal

Characteristics:

blood thirsty
ruthless
dangerous

Interesting facts:

Tigers are a symbol of strong.
Tigers cannot have the same
saree each tiger has a different
saree.

ANIMAL REPORT

ANIMAL NAME: Squirrel

Classification:

- amphibian
- fish
- reptile
- bird
- mammal
- insect

Diet: Squirrels eat raw hazelnuts and nuts

Life span: Live up to 3 years in nature

up to 10 years in captivity

Habitat: Lives on oak beech pine

trees in Europe Asia America

Continent: _____

Physical appearance:

Size: Squirrel size is 38 to 50 cm

Weight: they typical weigh about 400 to 600g

Colour: Squirrels are brown, grey and black

Skin: Squirrels skin is covered with fur.

Picture of my animal

Characteristics:

Long hind paws for jumping a few meters
It has a large beautiful tail that is covered with a long hair

Interesting facts:

There are over 265 species of squirrel worldwide.
Squirrels have four front teeth which never stop growing throughout their lives.
- Squirrels can eat their own body weight every week.
- Squirrels eyes are positioned in a way which allows them to see behind them.

ANIMAL REPORT

Yusra Jassim

ANIMAL NAME: kangaroo

Classification:

- amphibian
- fish
- reptile
- bird
- mammal
- insect

Diet: grass, flowers, leaves, ferns, moss, insects.

Life span: six years

Habitat: wooded forests, savannahs, deserts.

Continent: Australia

Physical appearance:

Size: 2.8m

Weight: 13kg - 90kg

Colour: grey, white, brown, red, ⁱⁿ sand, ^{colour} of

Skin: fur

Picture of my animal

Characteristics:

- Has powerful legs
- fast
- dangerous

Interesting facts:

Kangaroos have very powerful legs and can be dangerous at times.

Kangaroos can jump very high, sometimes three times their own height. The red kangaroo is the largest marsupial in the world.

- Kangaroo means: "I don't understand."

ANIMAL REPORT

ANIMAL NAME: jellyfish

Classification:

- amphibian
- fish
- reptile
- bird
- mammal
- insect

Diet: fish, shrimp, crabs, tiny plants

Life span: about 100 years

Habitat: Oceans

Continent: Asia and America

Physical appearance:

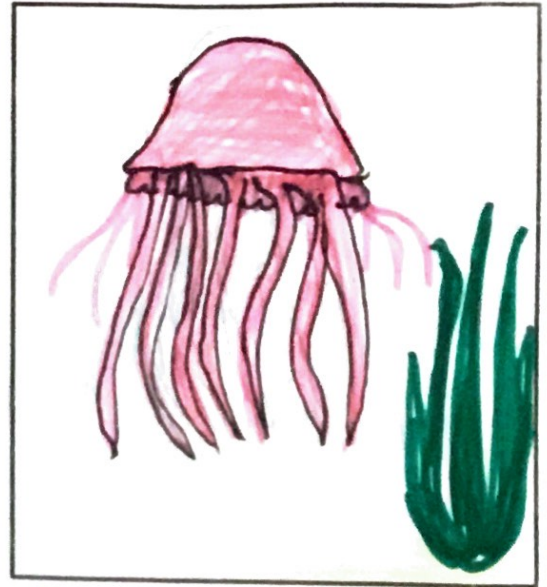

Size: 1m - 15m

Weight: 450 grams

Colour: pink, clearish blue

Skin: eksumbrala

Picture of my animal

Characteristics:

- dangerous
- poisonous
- edible

Interesting facts:

The jellyfish are named after a person in Greek mythology, the jellyfish. Because of their glowing cells, they were given the Latin name *Kindari*, which in Greek means glow, nettle.

Milica Vuletić

ANIMAL REPORT

ANIMAL NAME: Mosquito

Classification:

- amphibian
- fish
- reptile
- bird
- mammal
- insect

Diet: The mosquito feeds on both male and female humans and the females suck the blood.

Life span: The male mosquito lives for 2 weeks and the female for 2 weeks.

Habitat: They live in aquatic habitats.

Continent: They live all over the world.

Physical appearance:

Size: The length of a mosquito is 6 millimeters.

Weight: The mosquito weighs 2.5 milligrams.

Colour: The mosquito is predominantly brown.

Skin: The body and wings of the mosquito are covered with flakes.

Picture of my animal

Characteristics:

The mosquito fossil dates from the Cretaceous period 79 million years old. Mosquitoes are insectivores belonging to the Culicidae family.

ANIMAL REPORT

ANIMAL NAME: OWL

Classification:

- amphibian
- fish
- reptile
- bird
- mammal
- insect

Diet: INSECTS, EBH, YOUNG FOXES, ducks.

Life span: FROM TEN TO TWENTY YEARS

Habitat: FOREST

Continent: Europe, America, Africa, Asia.

Physical appearance:

Size: height: 10cm - 30cm

Weight: FROM 1KG - 3KG

Colour: BROWN, GRAY, white, black

Skin: FEATHERS

Picture of my animal

Characteristics:

Good HUNTER, FAST, big eyes, SHARP beak, see well over long distances

Interesting facts:

OWLS STAYS AWAKE ALMOST EVERY NIGHT. SHE CAN
TURN HER HEAD WITHOUT TURNING HER BODY.
THERE ARE OVER TWO HUNDRED SPECIES OF OWLS.

ANIMAL REPORT

ANIMAL NAME: lion

Classification:

- amphibian
- fish
- reptile
- bird
- **mammal**
- insect

Diet: meat - zebrass, rhinos, giraffes, buffaloes, elephants...

Life span: 10-18 years

Habitat: In Grasslands and Savanna

Continent: Africa

Physical appearance:

Size: male - 2,5m female 1,8m

Weight: male - 250kg female - 180kg

Colour: brown and orange

Skin: fur

Picture of my animal

Characteristics:

It has got: long tail, large head with big ^{mane} mane and round ears. It's very fast and big.

Veljko Varničić **ANIMAL REPORT**

ANIMAL NAME: Turtle

Classification:

- amphibian
- fish
- reptile
- bird
- mammal
- insect

Diet: Grass, vegetables, fruit

Life span: About a hundred years.

Habitat: Water and land

Continent: All continents.

Physical appearance:

Size: Up to 2 meters

Weight: Up to 600 kilo

Colour: green

Skin: Has armor and hard skin.

Picture of my animal

Characteristics:

They are slow, they haven't teeth. They see better than humans in the dark. They hear poorly. They like the sun.

Interesting facts:

Turtles have been around for over two hundred million years. The turtles cannot leave their armor completely. There are about three hundred different types of turtles.

ANIMAL REPORT

ANIMAL NAME: Shark

Classification:

- amphibian
- fish
- reptile
- bird
- mammal
- insect

Diet: meat, fish, turtles, shels, plankton

Life span: 20-30 years

Habitat: ocean, seas

Continent: all continents

Physical appearance:

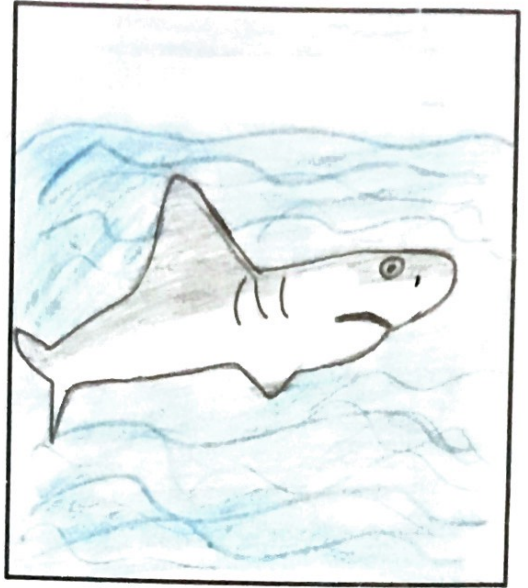

Size: from 1m to even 20m.

Weight: usually around 1,5t and up to 21t

Colour: usually neutral gray with creamy underbellie.

Skin: made of small teeth, feels rough and protect from injury.

Picture of my animal

Characteristics:

predators, they have super sense, have to swim all the time, very fast swimmers, fast, strong.

Interesting facts:

The earliest noun shark date back two more than 420 milion years ago.

ANIMAL REPORT

Kan Senic

ANIMAL NAME: spider

Classification:

- amphibian
- fish
- reptile
- bird
- mammal
- **insect**

Diet: Spiders are carnivores.
They eat insects.

Life span: They live from 3 to 9 years.

Habitat: Spiders live usually on land

Continent: They live on all continents

Physical appearance:

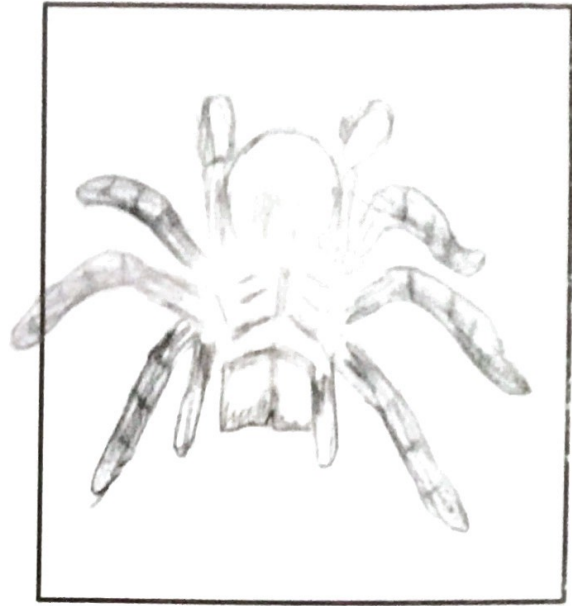

Size: They are size from 4mm to 10cm

Weight: Spiders are weigh from

Colour: There are all colors

Skin: Their body is covered with a shell

Picture of my animal

Characteristics:

- The spiders have 8 legs and the body divided into two parts
- They eat insects and live on all continents

Interesting facts: forty thousand
There are 40,000 species of spiders.

30, species are dangerous to humans.

They like to eat insects.

The most interesting thing is that they can make

threads and knit a net

ANIMAL REPORT

ANIMAL NAME: Flamingo

Classification:

- amphibian
- fish
- reptile
- **bird**
- mammal
- insect

Diet: brine shrimp blue-green algae, insect larvae, small insects

Life span: 40-60 years

Habitat: lakes, sandy islands

Continent: Africa, Asia, Europe and America

Physical appearance:

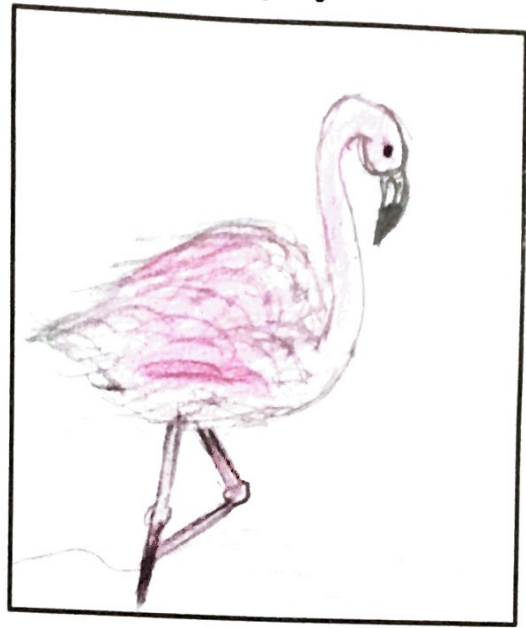

Size: 80-150 cm

Weight: 2,5kg-3,5kg

Colour: Pink

Skin: Pink

Picture of my animal

Characteristics:

The American flamingo is about 42 inches tall and has a wingspan of about five feet. It has pink feathers. It has a very long neck, long legs and feet with three toes.

Interesting facts:

Flamingos are very social birds. They live in colonies whose population can number in the thousands. Flamingos are national bird of the Bahamas.

ANIMAL REPORT

ANIMAL NAME: blue whale

Classification:

- amphibian
- fish
- reptile
- bird
- mammal
- insect

Diet: krill

Life span: 80 to 90 years

Habitat: okean

Continent: Antartik

Physical appearance:

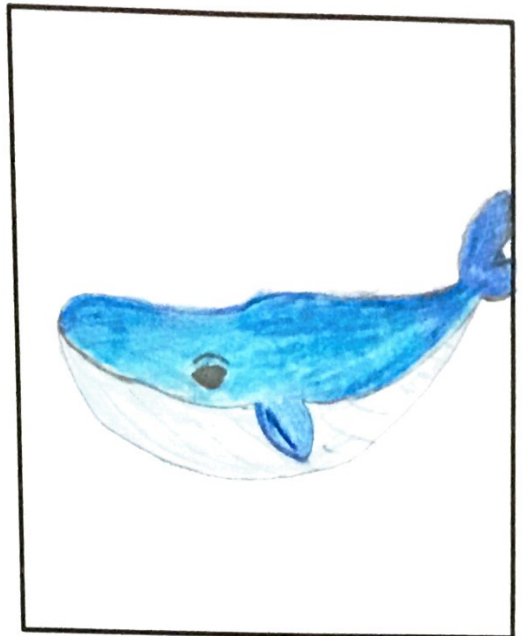

Size: 33m

Weight: 160t

Colour: blue-gray

Skin:

Picture of my animal

Characteristics:

the biggest,
dangerous,
the loudest animal
Strong
slow

Interesting facts:

He is the biggest animal and the most dangerous. A blue whale's tongue alone weighs as much as an elephant. The blue whale's is heavily around 400kg. Blue whales spend their summers in the cold water of the Arctic Ocean and winters in the tropical waters near the equator.
